

MAKE YOUR OWN AROUSAL CURVE

1. Before you cut them out, use the paper fastener to poke a hole through the dot on the arousal curve and the dot on the arrow.
2. Cut out the arousal curve and the arrow.
3. Push the paper fastener through the holes you made in the arrow and the curve to join them together.
4. Separate the prongs to secure the fastener in place.

You now have an arousal curve with a moving arrow!
